### OVERVIEW

## V10 KIT

ORDER CODE: **Y V10-KIT1**

#### Included:

1 x SUB 118-SP23

2 x VEGAS 10

2 x SpeakOn cables (A SPK2X2.5-10)

1 x Powercon True1 (IP65)

1 x Wheelboard-01

#### OPTIONAL ACCESSORIES:

- > Stands
- > Weather Protection Covers

Outline's V10 kit comprises three loudspeakers which form a portable sound system that produces enough power and coverage to satisfy a very wide range of applications in music and performance, a ready-to-use setup that allows you to focus on your performance.

Manufactured using the same premium components, materials and finishes as our flagship touring systems, the two Vegas mid-high cabinets and the matching SUB 118-SP23 subwoofer produce powerful, full-range audio down to 35Hz.

The SUB 118-SP23 subwoofer is fitted with our own design, high-power, Class D amplification which is optimised for the V10 Kit, powering both mid-high speakers and the subwoofer. This concept also minimises cabling and allows for the simplest and quickest setup, literally taking only minutes to prepare for use.

Less plug, more play

FEATURES

Peak power handling of 4.5kW (4,500 watts) delivering crystal-clear audio to a maximum SPL of 141 dB\*

All enclosures made of top-grade birch ply, not sonically inferior and less robust plastic

System design using integrated power amplifiers makes it not only quick and easy to use but also very cost-effective, especially when its cost is compared to the audio performance

Voiced just like all our products so that V10 kits can easily be combined or integrated with other Outline products and systems if required

The V10 Kit includes a full range of accessories including two Neutrik Speakon speaker cables, a Neutrik Powercon power cable and a wheel board for the subwoofer for ease of transport. Weatherproof covers and stands are available as optional extras

100% designed and manufactured in Italy, like all Outline products!
