

GSR + SUB: APPLICATION NOTE

This document specifies how to properly use the Outline GSR-SUBEX1 (self-powered subwoofer kit) to extend the Outline GSR's frequency response.

The kit includes #1 SUB110-SP, #1 shower cap and #1 1mt XLR cable.

For a correct coupling, the SUB110-SP must be set with the "PRESET 1" and the potentiometer set to 0 dB.

As for the L3000, the "GSR + SUB" preset must be loaded (available on our website in the '[Preset download](#)' section) and together with the potentiometer set at 0 dB.

SUB 110 SP
