

# Digitalite Scores With Outline MANTAS System

***Derek Yeoh, a bright young man started off in the AVL industry in 2004 doing sales for technical support in the Events and Entertainment Industry. His yearning for a piece of the action prompted Derek to setup DIGITALITE Sdn Bhd in a short period of four years in 2008.***

In the early days, his emphasis was on providing LED screen solutions but this eventually led to his acquiring Audio, Visual and Lighting equipment as well. His yearning was so great to provide quality Audio solutions to accompany his LED business that he took the major step in purchasing the Outline MANTAS Line Array System from Chip Chong of Pan Asia Integrated Systems Sdn Bhd, the Malaysian Outline distributor since October 2014. The decision wasn't an easy one, according to Derek as he was spoilt for choice and offers to audition and own other competitive brands available in the market such as NEXO, RCF, TW Audio, PROEL and Audio Center. Derek was sold on the sound quality of the Outline MANTAS and as the saying

goes, the rest is history. He also noted that the reputation of the product and the excellent advice and support from Chip played an important role in the selection. Derek says that the greatest satisfaction he derives is from the fact that he is now able to provide high end Audio Reinforcement quality to supplement the rest of his services small, medium and large venues. This is proven by the number of positive comments he has received from clients both local and international and other industry experts. He admits that the Outline MANTAS was his most significant purchase to date. Derek's future expansion plans include, you guessed it, more Outline MANTAS and other models from Outline. Chip has this to say: "I have done projects and shows with Outline products during the last five years and I'm very confident in representing the brand in the region. I have full support from the Outline team who are dedicated and committed to easing all technical issues that may arise while continuing to research, develop and manufacture products of the highest quality while scoring many patents."

**DIGITALITE inventory:**

- 12 OUTLINE MANTAS (Biamped)
- 06 OUTLINE DBS 182i (Subs)
- 04 OUTLINE T FIVE
- 03 OUTLINE T NINE
- 02 OUTLINE IP24 (Processor)
- 02 VMB TL 300 Line Array Lifter
- KLOTZ Cables
- MIDAS PRO 2 & DL 251
- Various LED Panels
- Various lighting equipment

AVL Times' Sridevan Srinivass had a chance to observe Digitalite's MANTAS system at The Grand Ballroom of Grand Hyatt Kuala Lumpur recently: "The MANTAS was very precise in its delivery, be it playback or the live band mixed through a Midas PRO2. It had the reserve SPL to boot and enough headroom. I thought it needed a little more in the High- Mid section but then again, sound is individual listening and perception. It could also be that this industry dinosaur has tired ears!"
