Outline iMode Delights The Netherlands

Abcoude-based Soundcheck, one of the country's respected rental firms, have taken delivery of two brand-new iP24 iMode controllers, the most advanced and "great sounding" digital audio processor ever manufactured by Outline, based on its iMode's unique proprietary Processing Platform.

Initially looking for one of the world's most popular and powerful DSP, Soundcheck owner Rodney van Zwol, after a demo, decided to go for the Outline iP24 instead. He states: "I was knocked out by the sonic performance of this iP24 and how easy the iPad control software operates. The on-board features are so easy to work with, and the amount of filter processing power is simply unbelievable."

A major advancement of Outline's proprietary iMode Processing Platform, the iP24 is a multi-purpose DSP loudspeaker controller housed in a single 19" rack space. It now provides all the features associated with the iMode platform, and able to control external amplifiers and passive sound reinforcement systems. Featuring the highest audio resolution presently available, the iP24 is fully controllable via iOS Native App and MacOSX Native App, and also via web Browser for compatibility with several Operating Systems. The controllers have been sold by 'The Audio Specialists' - Outline's distributor for Benelux and Germany.
