

IN BRIEF...

Outline supplies waterfront venue in Beirut with a robust sound system.

Described as a green island in the heart of Beirut, Seven Sisters located at the Beirut Waterfront is an outdoor paradise that features several hidden gems, all of which surround the circular bar. Visitors to the bar will experience great drinks, delicious food and can enjoy a beautiful sunset while listening to live bands. The ethos at the venue is dine, drink, dance, repeat.

It was vital the correct audio equipment was specified to cope with the harsh outdoor environment at Seven Sisters so the management team turned to local integrator, Sound Pressure Level to install the best solution. Needing high quality performance at high SPL level, Sound Pressure Level looked to its Outline portfolio for the answer, installing 38 Eidos

loudspeakers - 10 Eidos 12's and 28 Eidos 10's - alongside eight Eidos 218S subwoofers to extend the low frequency response. The system is driven by two Genius 24 digital controllers, four T-Five amplifiers and five M-5000 amplifiers, also manufactured by the Italian company.

Special thanks for this project go to Elie Louaizi and Maya Louaizi of Sound Pressure Level, Karim Mohamadieh for the management and contracting, Rabih Fakhreddine for his trust and encouragement along with Joe Ziadeh and Tony Hayek who supplied the power and did a great job with the electrics.
